Indian Peaks Men's League Pace of Play Guidelines and Policies

Your position on the course is directly behind the group in front of you, NOT directly in front of the group behind you!

The IPML pace of play policy leaves the responsibility for maintaining the pace of play where it belongs, with you, the player. If you are the first group in the field, play efficient golf. If you are in a following group, keep up with the group in front of you and you will not have a pace of play issue. Pace of play is measured against the group in front of you (not the group behind you) and the allotted time to play each hole. It is the responsibility of everyone in the group to make sure you are in position. If your group is out of position, talk amongst your group about remedying the situation.

If you fall behind, you are expected to play efficient golf and get back into position. This might mean playing ready golf, or continuous putting, which are both allowed in stroke play. Your playing partners, the foursome behind you, and the Indian Peaks staff will thank you.

- It is the responsibility of everyone in the group to make sure you are in position.**
- All groups are expected to complete the front 9 in 2:12 and complete the round in 4:28 or better**
- We will be monitoring turn times. If your group finishes the front 9 in more than 2:20 and is more than 15 minutes behind the group in front of you, your group will be issued a warning.**
- If a group finishes the round in more than 4:45 and is more than 15 minutes behind the group in front, all members of that group will be issued a 1-shot penalty.**

The tournament committee will hear appeals for exceptional situations and will be considered only in the scoring area after the completion of the round.

Tips for Improving Pace of Play

1. Be aware of your position on the course in relation to the group ahead. Any large gaps indicate your group is out-of-position. ***Your position on the course is directly behind the group ahead, regardless of where the group behind you is.***
2. Play ready golf anytime your group has fallen behind.
3. Hit a provisional ball for shots that may be out of bounds or lost *outside* of a hazard. A provisional ball should be played for shots landing in native grass areas. You should never have to walk back to the tee!
4. Look for another player's ball only after you have played your shot. The time limit for a search is 3 minutes.
5. If your ball is in an area where you don't think you can play it anyway, stop searching and play your provisional.
6. Get your yardage as you are walking to your ball. Don't get to your ball and then go looking for a yardage.
7. Be ready to play when it is your turn. Have your club chosen and practice swings completed.
8. Place your bag or park your cart on the side of the green closest to the next tee.
9. Continuously putt if you won't interfere with another player's line to hole out sooner.
10. Start lining up your putt while others are putting so that you are ready when it is your turn.
11. When you hit your drive, pay close attention to where it is heading. If possible, line it up with a tree or other landmark so you can go right to it.
12. If you can walk to your ball without disturbing your playing partners then do so. Don't cluster around the farthest ball out.
13. For best ball events, if you are out of the hole, pick up and write down your estimated score followed by an 'X'. No need to grind out an 11 when your partner is already in with a 4. For handicap purposes you can only take the maximum per ESC anyway.
14. Be ready to walk off the tee before the last person hits from the teeing ground. That way you should already be walking before his drive hits the ground.
15. Record your score on the next tee box while someone else is hitting.

Indian Peaks Men's League Handicapping

The purpose of the World Handicap System is to make the game of golf more enjoyable by enabling players of differing abilities to compete on an equitable basis. The System provides a fair Course Handicap for each player, regardless of ability, and adjusts a player's Handicap Index up or down as the player's game changes. At the same time, the System disregards high scores that bear little relation to the player's potential ability and promotes continuity by making a Handicap Index continuous from one playing season or year to the next. A Handicap Index is useful for all forms of play, and is issued only to individuals who are members of a licensed golf club.

Two basic premises underlie the World Handicap System, namely that each player will try to make the best score at every hole in every round, regardless of where the round is played, and that the player will post every acceptable round for peer review. The player and the player's Handicap Committee have joint responsibility for adhering to these premises.

All Tournament Scores from Men's League competitions will be posted by staff for the individual player. Players **should not** post these scores as it would result in the double-posting of scores.

To ensure your handicap is as accurate as possible, all scores should be posted, home and away. Nine-hole scores will be held by the computer and combined when another nine-hole score is posted. It takes a minimum of 3 18-hole scores to establish a handicap. The system uses your most recent 20 scores when calculating your handicap.

Indian Peaks Men's League is managed by the golf staff at Indian Peaks GC Golf Shop
